

TerraBond™ Technical Data Sheet

TerraBond is comprised of a high strength woven HDPE membrane that is thermally bonded to a polypropylene geotextile. The TerraBond layer is installed as a protection course over the TerraBase and TerraCore layers with the geotextile side facing up. The TerraBond layer also provide an excellent substrate and friction surface for concrete to adhere to.

TerraBond
(HDPE-Geotextile
Composite)

General Properties

Properties	Test Method	TerraBond
Film Thickness		23 mil
Color		Clear HDPE - White Geotextile
Weight	ASTM D751	TBD
Tear Strength (Trapezoidal)	ASTM D1117-97	TBD
Puncture Resistance	ASTM D4833-07	TBD
Life Expectancy	ASTM E 154-93	Indefinite
Elongation	GeoKinetics	TBD
Packaging	104" x 150'
